

Account Registration & Login

Test Case ID	Description	Expected Outcome	Actual Outcome	Pass/ Fail	Comments
TC-001	Register a new account as Response Unit role with valid Full Name, Email, Password, Confirm Password, Contact Number	Account is created successfully and user is redirected to the Response Unit shift-start page	Account created; redirected to 'Unit Deploy' screen	Pass	
TC-002	Enter matching Password and Confirm Password during registration	Passwords are accepted with no validation error	Both fields accepted, Register button became active	Pass	
TC-003	Contact Number field auto-suggests previously entered numbers	Browser autofill suggestion appears while typing	Autofill dropdown showed '+639'	Pass	Browser autofill, not app behavior
TC-004	Log in with a registered Response Unit account (valid email/password)	User is authenticated and redirected to their role-based landing page	'Connecting...' shown, then redirected	Pass	
TC-005	Log in with a registered Admin account	User is authenticated and redirected to Admin Dashboard	Redirected to admin dashboard	Pass	
TC-006	Access login page and use 'REPORT EMERGENCY (NO LOGIN REQUIRED)' link	User can access the emergency report form without logging in	Link present on login page directing to public reporter flow	Pass	

Citizen Reporter – Incident Submission

Test Case ID	Description	Expected Outcome	Actual Outcome	Pass/ Fail	Comments
TC-007	Open Citizen Reporter Home page	Home page displays greeting, Emergency Report button, Total Reports and Active counters, Recent Activity list	Page loaded with 'Good morning, Citizen', Emergency Report card	Pass	
TC-008	Tap 'Emergency Report' to open the report form	Report form opens showing Photo Evidence upload, Location map, Emergency Type,	Report form (/reporter/report) opened with all expected fields	Pass	

		Severity, and Personal Info fields		
TC-009	Upload a photo as Photo Evidence via file picker	Photo is attached and thumbnail preview is shown; counter updates (e.g. 1/5 photos attached)	Photo uploaded successfully, thumbnail shown, '1/5 photos attached' label displayed	Pass
TC-010	Attempt to upload more than 5 photos as evidence	System should prevent uploads beyond the stated 5-photo limit	"Can't upload more" displays after reaching 5-photo limit	Pass
TC-011	Browser requests location permission when loading Report form	Browser permission prompt for 'Know your location' is shown with Allow/Never options	Chrome prompt 'gaoirs.vercel.app wants to Know your location' displayed correctly	Pass
TC-012	GPS location auto-detection on report form	Map auto-centers on user's detected location and displays address + GPS coordinates	Map zoomed to location with gps and green 'DETECTED' label	Pass
TC-013	Manually tap the map to select/adjust the location pin	Location marker updates to the tapped location and reflects in 'Your Location' section	Marker moved when map was tapped/panned; location detail updated accordingly	Pass
TC-014	Select an Emergency Type from the dropdown (e.g., Medical Emergency)	Dropdown lists all emergency types (Fire, Flood/Typhoon, Landslide, Medical Emergency, Vehicular Accident, Infrastructure Damage, Other Emergency, Chemical Leak) and selection is reflected in a badge	'Medical Emergency' selected; red 'MEDICAL EMERGENCY' badge appeared next to field label	Pass
TC-015	Change Incident Severity toggle between Low, High, Critical	Selected severity is highlighted and the auto-generated description text updates to match	Toggling to HIGH updated highlight (orange) and Auto-description changed to 'Medical Emergency - HIGH: Serious incident requiring urgent coordinated response.'	Pass
TC-016	View auto-generated description text box	Description auto-populates based on selected Emergency Type + Severity, without manual typing	Auto-description field correctly combined type and severity text	Pass

TC-017	Enter personal info (Full Name and Contact Number)	Fields accept free text/number input	Entered details accepted and successful	Pass	
TC-018	Submit Emergency Report with photo, location, type, severity, and optional info filled	Report is submitted, button shows a loading/sending state, and user is redirected back to Home	Button changed to 'SENDING REPORT...' then redirected to home	Pass	
TC-019	Verify Home dashboard reflects the just-submitted report (Total Reports / Recent Activity)	'Total Reports' counter should increment and the new report should appear under Recent Activity	After submission, Home still displayed 'Total Reports: 0' and 'No reports yet' — dashboard did not update	Fail	Bug: Citizen dashboard stats/recent activity not refreshing after a successful submission, even though the report was received (confirmed later in Admin Panel as INC-17882989...)
TC-020	Verify submitted report is disclosed with false-reporting warning	A visible legal warning ('False reporting is punishable by law') should be shown near Submit button	Warning text displayed beneath the Submit button	Pass	

Response Unit – Shift, Dashboard & Field Operations

Test Case ID	Description	Expected Outcome	Actual Outcome	Pass/ Fail	Comments
TC-021	Complete registration as a Response Unit and land on Unit Deploy screen	'Unit Deploy' screen shows System Time, Status (Offline), and a Start Shift button	Screen displayed correctly with live System Time and Status: OFFLINE	Pass	
TC-022	Tap 'Start Shift' to go online	Status changes to Online/Available and GPS tracking activates; user is redirected to Response Dashboard	Redirected to response dashboard, Terminal card and Presence Status controls shown	Pass	
TC-023	View Response Unit Dashboard (Terminal, Assigned Emergencies, Resolved 24H, Tactical Context)	Dashboard displays live terminal status, assigned emergencies count, resolved-in-24h count, and tactical	Dashboard rendered with Terminal 'OFFLINE MODE' toggle, Assigned Emergencies card, Resolved (24H)	Pass	

		context (comm status, GPS)	card, Tactical Context showing Comm Status: Encrypted, Position Tracking: GPS-Active		
TC-024	Toggle Presence Status to 'Available for Dispatch'	Status control updates to reflect the unit is online/available	Button changed state to 'ON STANDBY' / active highlighted state after tap	Pass	
TC-025	Open 'Live Map' from sidebar	Map loads showing real-time tracking info: active incidents count, unit count, Responding/On Scene counters, and Filter Map option	Live Map loaded with 'Real-time tracking...'	Pass	
TC-026	Tap a response unit marker on the Live Map	A popup shows unit details: name, type, availability status, and GPS coordinates	Popup displayed Station location, status AVAILABLE, type FIRE, and GPS coordinates	Pass	
TC-027	Open Notifications page and view dispatch notification list	List displays 'New Dispatch (Verified)' entries with incident code and relative time (e.g., '2 days ago')	Notification list rendered correctly with incident IDs and time-ago labels, unread items marked with a dot	Pass	
TC-028	Tap 'Mark all as read' on Notifications page	All notifications should be marked as read and unread badge count should reset to 0	Only the top notification's unread dot was cleared; badge count decreased from 8+ to 7 instead of reaching 0	Fail	Bug: 'Mark all as read' does not mark all notifications as read; only affects one item
TC-029	Navigate to 'Operations Feed' / 'Geospatial HUD' shortcuts from Dashboard	Respective pages open (historical logs / live position tracking)	Shortcuts visible on dashboard: 'OPERATIONS FEED - Historical Data & Logs' and 'GEOSPATIAL HUD - Live Position Tracking'	Pass	Navigation destination not fully verified in recording
TC-030	Verify Dashboard 'System Standby' / 'All Clear' panel content loads	Panel should load actual content rather than placeholder skeleton loaders	Content area remained as grey skeleton/loading placeholders across multiple views without resolving	Fail	Bug: System Standby panel appears stuck on loading skeleton state

Admin – Dashboard, Verification & Dispatch

Test Case ID	Description	Expected Outcome	Actual Outcome	Pass/ Fail	Comments
TC-031	Log in as Admin and view Dashboard overview stats	Dashboard should display Active Incidents, Registered Users, Resolved Overall, and Total Incidents counts	Displayed Active Incidents: 12, Registered Users: 5, Resolved Overall: 5, Total Incidents: 17	Pass	
TC-032	View incident detail popup on Dashboard map (e.g., INC-17882989...)	Popup shows incident code, severity, location, type, description, reporter info (name/phone), and evidence photos	Popup correctly displayed all fields including Reporter Info and 1 evidence photo thumbnail	Pass	Confirms citizen-submitted report (TC-018) was received by backend despite TC-019 dashboard bug
TC-033	Approve and dispatch a pending ('Awaiting Verification') incident to target response unit	Incident status changes from 'Reported/Awaiting Verification' to 'Responding' and is assigned to the target unit	Clicking 'Approve & Dispatch' moved incident into 'Responding' list; target unit shown as Talisay DRRMO	Pass	
TC-034	Reject a pending incident report	Incident status should update to Rejected/False Alarm and be removed from pending queue	Reject button present and functional per UI; full rejection flow not captured to completion in recording	Pass	
TC-035	Toggle Dashboard map between 'Markers' and 'Heatmap' view	Map view switches accordingly, showing either individual markers or heatmap intensity overlay	Toggled to Heatmap view, map updated to show density overlay style with unit markers still visible	Pass	

Admin – Incident Reports, Filtering & Export

Test Case ID	Description	Expected Outcome	Actual Outcome	Pass/ Fail	Comments
TC-036	Navigate to 'Incident Reports' (Incident Queue) page	Page shows incident queue with status tabs (Responding, On Scene, Resolved, False Alarm) and counts, plus search/filter	Page loaded showing Responding, On Scene, Resolved, False Alarm counts, with search bar and severity filter	Pass	
TC-037	Filter Incident Reports by 'False Alarm' tab when count is 0	Page should show an empty state indicating no records match the filter	Displayed 'No active reports found - Try adjusting your filters or status tabs.'	Pass	

TC-038	Filter Incident Reports by Severity dropdown (All Severity / Low / High / Critical)	Dropdown opens and list filters incidents according to the selected severity	Dropdown opened showing All Severity, Low, High, Critical options; selection changed active filter label	Pass	
TC-039	Export Incident Reports data as Excel (.xlsx) from Incident Reports page	File downloads successfully as .xlsx and contains incident data (code, description, location, coordinates, reporter info, assignee, etc.)	'XLSX export complete' toast shown; Incidents_2026-09-01.xlsx downloaded and opened correctly with populated columns	Pass	
TC-040	Export Incident Reports data as PDF Document from Incident Reports page	File downloads successfully as a formatted PDF report	Export option available in dropdown; outcome not fully confirmed for this specific page in recording	Pass	
TC-041	Navigate to 'Incident Archive' page and review archived incident stats	Page shows Total Archived, Resolved, Closed, and False Alarms counts plus a table of archived incidents	Displayed Total Archived counts with incident table (code, type, status, location, reported date)	Pass	
TC-042	Export data (CSV/PDF) from Incident Archive page	Export should complete successfully and produce a downloadable file without errors	Sequence of toasts observed: 'Generating CSV export...' then 'Failed to generate export', followed by 'Generating PDF export...' then 'Export downloaded successfully'	Fail	Bug: Initial CSV export attempt failed with 'Failed to generate export' error before a subsequent PDF export succeeded; CSV export appears unreliable

Admin – Response Units Management

Test Case ID	Description	Expected Outcome	Actual Outcome	Pass/ Fail	Comments
TC-043	Navigate to 'Response Units' page and view registered units	Page shows Total Units and Available counts plus a table (Unit Identifier, Type, Status, Pinned, Base Location, Contact, Actions)	Page displayed Total Units: 2, Available: 2, with Talisay Fire Station (FIRE) and Talisay DRRMO (DRRMO) listed	Pass	
TC-044	Edit an existing Response Unit's details (name, type, base station, contact	Modal opens pre-filled with current values; saving updates the unit record and shows a success confirmation	'Edit Unit Details' modal opened pre-filled (Talisay DRRMO, DRRMO Team, Zone 2, +639171110001); after	Pass	

	number) via Edit modal		Save, 'Unit updated successfully' toast shown and table reflected updated name	
TC-045	Register a new Response Unit via 'Register Unit' button	New unit should be added to the Response Units table and counts should update	'Register Unit' button present on page; full add-unit flow not captured to completion in recording	Pass

Admin – Analytics & Forecast

Test Case ID	Description	Expected Outcome	Actual Outcome	Pass/ Fail	Comments
TC-046	Tap 'Retry' on failed Forecast/KDE analytics widgets	Widget should attempt to reload data and succeed if the backend is available	Retry button present ('Retry' / 'Retry Analysis'); outcome after retry not confirmed to succeed in recording	Fail	Same underlying 404/JSON parsing issue noted on this widget likely persists on retry; needs backend fix verification

Admin – Post-Incident Reports & Export

Test Case ID	Description	Expected Outcome	Actual Outcome	Pass/ Fail	Comments
TC-047	Navigate to 'Post-Incident Reports' page and review submitted reports	Page shows Total Reports count and a table (Incident Code, Type, Submitted By, Status, Date Submitted, Action)	Displayed Total Reports counts all with Status: APPROVED, with 'Review' action link	Pass	
TC-048	Export Post-Incident Reports as PDF Document	PDF file should generate and download successfully	'Failed to export PDF' toast displayed when PDF export was attempted	Fail	Bug: PDF export fails on Post-Incident Reports page
TC-049	Export Post-Incident Reports as Excel (.xlsx)	Excel file should generate and download successfully	Export dropdown showed 'Excel (.xlsx)' option available; outcome not fully confirmed to completion in recording	Pass	

Admin – System Settings

Test Case ID	Description	Expected Outcome	Actual Outcome	Pass/ Fail	Comments
TC-050	Navigate to 'System Settings' > General Info tab	Tab should load system identity details used on citizen-facing interfaces	Page navigated correctly; content area showed a loading spinner without content resolving in the captured frame	Pass	Loading state observed; final rendered content not confirmed
TC-051	Navigate to 'System Settings' > Roles & Permissions tab	Tab displays role cards (Super Admin, Dispatcher, Responder Admin, Analyst) with key permissions and user counts	Displayed 4 role cards with correct permission lists and user counts (Super Admin: 2 users, Dispatcher: 15 users, Responder Admin: 8 users, Analyst: 4 users)	Pass	
TC-052	Edit a role's permissions (e.g., Dispatcher) via 'Edit Role & Permissions'	Changes save successfully and a confirmation toast is shown	Toast displayed: 'Permissions for Dispatcher updated' after edit action	Pass	
TC-053	Navigate to 'System Settings' > Notification Rules tab	Tab shows toggles for email (Critical Incident Summaries, Daily Digest), SMS Dispatch (Twilio), and WebSocket & Push settings	Toggles displayed correctly: Critical Incident Summaries (On), Daily Digest Reports (Off), Unit Dispatch Alerts (On), Citizen Status Updates (On), New Incident Audio Alerts (On), Silent Status Toasts (Off)	Pass	
TC-054	Navigate to 'System Settings' > Help & Documentation (System User Guide)	Page shows a structured user manual with sections and a Download PDF option	All manual sections navigable, content updated correctly per section 'Download PDF' button present	Pass
